TECHNOLOGY CENTER 2800 Conditioned upon entry of new claims 37-71, cancel claims 1-36.

Kindly enter new claims 37-71 as follows: 10

> 37. A laser for emitting pulsed electromagnetic radiation, said laser comprising an optical resonator;

a solid-state laser gain medium placed inside said optical resonator, said laser gain medium having two end faces, and at least one of said end faces comprising a cooling surface;

means for cooling said laser gain medium via said cooling surface; 15

means for exciting said laser gain medium to emit electromagnetic radiation; and

means for passive mode locking comprising a saturable absorber placed inside said optical resonator.

38. The laser according to claim 37, wherein said laser gain medium is in the shape of a thin plate or layer with two end faces, the extension of said end faces being greater than a thickness of said 20 plate or layer measured essentially in a direction perpendicular to one of said end faces.
